Innovative Enhancements to Increase Productivity and Reliability

AF50, AF200 and AF300 Hopper Loaders

Hopper Loader Nose Control Enhancement - 7701.8081.1

The controls of your AF300 Hopper Loader can be relocated to the nose of the loader. This allows for speed adjustment, starting and stopping of the loader at the point of use.

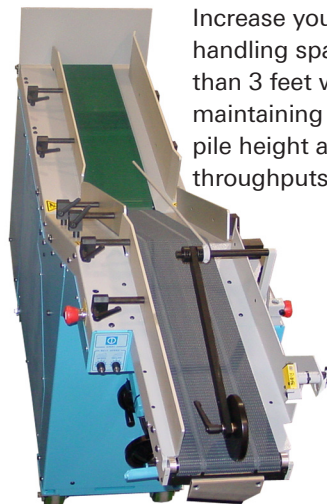

AF300 Hopper Loader - 7701.0027.1

Used to reduce staffing and improve the feeding of inserts. Through its use you will also be able to increase your inserter productivity.

AF50 Hopper Loader - 7701.0046 For use on SLS2000 and SLS3000

Increase your material handling space by more than 3 feet while maintaining consistent pile height and higher net throughputs.
